WE'RE MODULAR!

If you have the connectors included in our "Dynamic" display configuration as shown above...

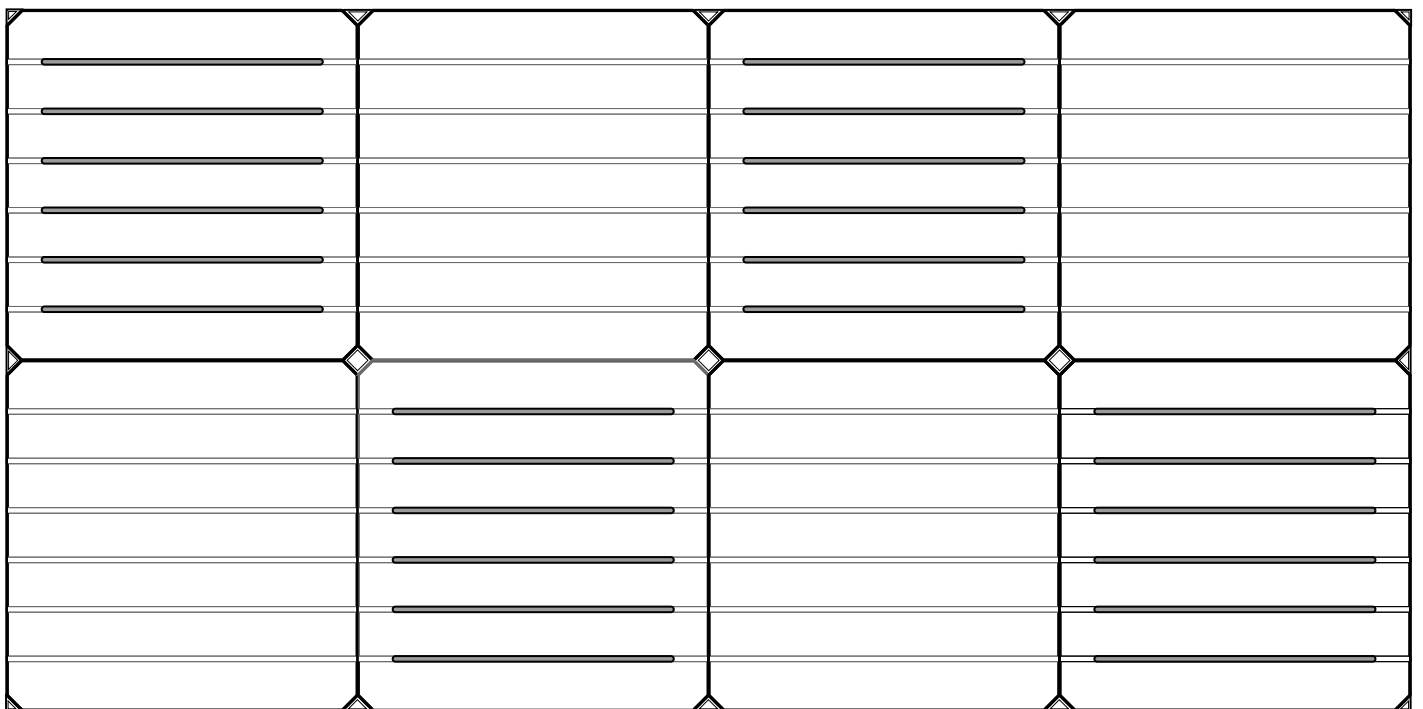

...you can assemble a large variety of other displays, including floor towers and other floor displays, but also a large number of our table displays. This is where GOGO panels excel - providing you with a modular display system that is adjustable to your current needs.

You can always add additional panels, to even further expand your modular design possibilities.

Panels can be rotated and used with or without the slatted side facing out.

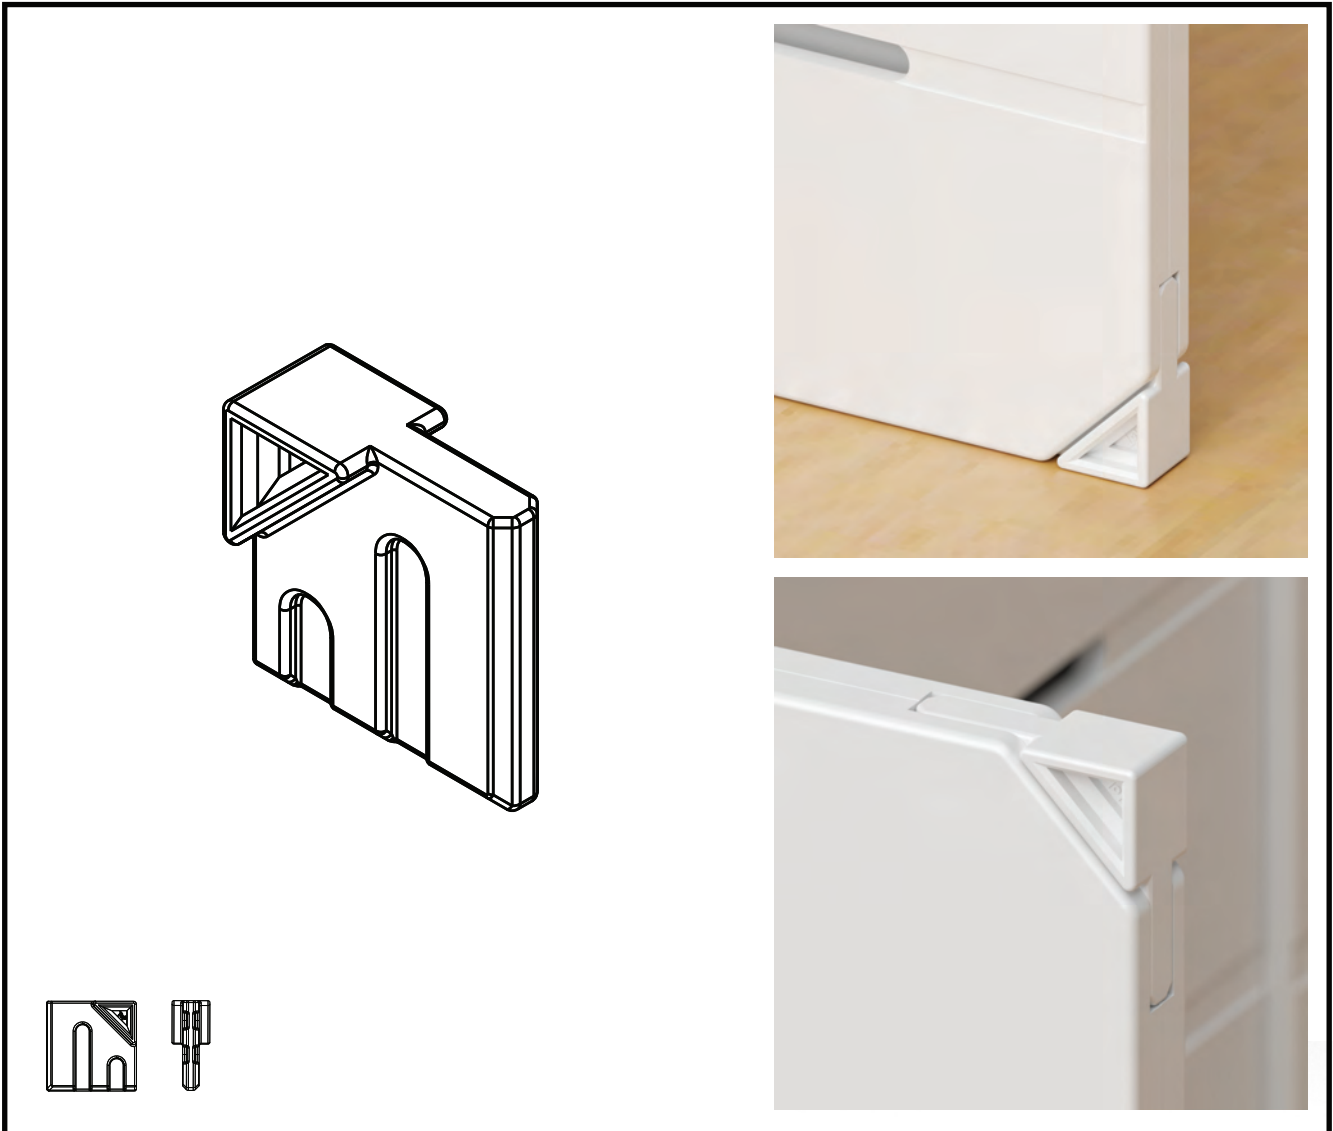

ASK ABOUT OUR PRINTED WOODEN PANELS

A printed panel can set the right tone for your entire brand representation when it's most important. While we have a selection of wood textures and colors, we can also work with you and your team in creating customized panel artwork.

For more information about our wooden panels, please call **702-800-1941**.

CONNECTOR SYSTEM

GOGO Panels' internal connector system provides it's user with a NO TOOLS REQUIRED, ultra-lightweight, durable, and eye catching trade show booth for almost any occasion. Seemingly limitless configurations can be achieved with a basic set of connectors. This provides the perfect modular and portable display system for indoor and outdoor use. We do not, however, recommend prolonged exposure to direct sunlight.

1 PANEL

2 PANELS

3 PANELS

4 PANELS

No more than 4 panels (8ft) in a straight wall section is recommended.

optional support wall angles

it's recommended to build in extra weight support on ends of long display configurations.

Optimal long wall weight distribution configuration.

For configurations longer than 20 feet, support walls should be built by full panels.
